Profile

Detail-oriented and motivated individual with strong proficiency in Python and a solid understanding of C++ programming. Eager to apply my programming skills and problem-solving abilities to contribute effectively in a dynamic team environment.

Education

BTech Computer Science (Artificial Intelligence and Machine Learning), *VIT Pune* 10/2024 – present
I am currently a second year student at Vishwakarma Institute of Technology, Pune. Pune, India

Skills

Python
Proficient in advanced python.

C++ Programming Language
Intermediate level of C++

Machine Learning
Fully proficient in Machine Learning.

Deep Learning (CNN)
Have an in depth understanding of how CNNs work and behave.

Languages

English
Fluent

Japanese
Conversational

Hindi
Fluent

Marathi
Fluent

Projects

LocateVision, *AI Image Recognition Model* 09/2024 – 02/2025
An AIML model that pinned a location on a map by using an input of a picture from the user. Used a hybrid Transformer Convolutional Neural Network for processing.

SecureBank, *Fraud Detection Model* 03/2025 – 06/2025
An AI Model, that uses TabNET and various other models to create a safe and secure banking service with a highly advanced Fraud detection system.

Deep Temporal Attention Networks for Music Genre Classification: An Empirical Study on the GTZAN Dataset 09/2025 – 12/2025
Built a deep CNN–Transformer model for music genre classification on GTZAN, achieving ~95% accuracy using attention-based temporal modeling and spectrogram augmentation.

Publications

Adaptive TabNet–β-VAE Fusion Ensemble Closes Uncertainty Gap In Fraud Detection,
Springer Lecture Notes in Networks and Systems (LNNS)
Our paper has been accepted and has been licensed but has yet to be published as the Scopus journal is not published yet.

Achievements

Acceptance of Paper Adaptive TabNet-β-VAE Fusion Ensemble for Uncertainty-Aware Fraud Detection in 2025 5th International Conference on Machine Learning and Big Data Management (MLBDM 2025).

Completed a Half Marathon (21.1 km) for the CME Soldierathon, highlighting consistency and goal-driven training.
